

CS329E: Project #0

Part 1 – Due Sept 24

Part 2 – Due Oct 1

Create a website or software. The theme and purpose is open to group decision. However, it must have some sort of purpose. It must also include the following:

- The ability for some sort of upload of files (e.g., .doc, .pdf, .png, .gif, etc.). It is not required to allow every file format, but it should do at least two types,
- The site/software has public and private or log-in required portions
- The site should allow for multiple types of users with different access levels (e.g., admin vs. regular users vs. guest user)

Part 1: First Release and Second Release

- Included in your progress report:
 - User Stories
 - Necessary exploration
 - Estimation of difficult of implementing each story
 - Estimation of speed of story implementation
 - The stories chosen for the first release
 - The stories chosen for the second release
- The code for the stories included in the first release (i.e., Sept 11- 17)
- The code for the stories included in the second release (i.e., Sept 18-24)

(Hint: You should aim for 50-60% of the user stories completed by the end of the second release)

Part 2: Final Release (i.e., Sept 25-Oct 1)

- Working software/website
- User Manual
- Report
